

# PRECISION BOILERS

## Bolt News

### Product of the Month

Jonas Hildreth with Tim Hildreth Co. Inc., a new Precision Rep, sold Three FTS2-100 boilers

#### Job Site

Iowa Lutheran Hospital

### UP-Dates

#### Web-Site:

Phase 1 of Precision Boilers new Web-Site is up and running. General reviews from the Rep Force have been great. Several times a week we add new Precision Boilers sales brochures. We have seven new pieces of literature in the literature section and a new high level company brochure of all Precision's products. We are calling the high level brochure the Quad-Fold. This is a great piece of literature to hand out to Engineering Companies, Contractors and End-Users. The great thing is these are all printable off the web-site so you can have your information instantly.

Phase II is in progress. It will have a Rep locator which will have the Rep's name and information for each territory and will be hyper-linked to each Rep's web-site. We have created a private side of the website. Each Rep will be issued a login and password. The private side of the site will have engineering drawings, technical information, submittal support documents, etc.

#### AHR Show:

Precision is showing this year at the AHR Show in Chicago, IL. Our booth number is # 5083. We are preparing for a great show focused on enhancing and growing the Precision Boilers Brand. We have purchased a new display booth. We will have several products on display as well all of our new literature. We are finalizing plans for our annual Rep dinner, similar to last year's dinner in Las Vegas. We hope to see you all there. As we get closer to the event I will send out the Invitation and information on the location and time.

#### Feed Back:

As we continue to improve our ability to support you the Rep and our shared customers, Precision Boilers is proud to announce a new focus on product development and enhancement. Based off feedback from our Rep network, we intend to initially focus on **Condensing and Ultra Low-Nox Boilers.**

I will be seeking your feedback to insure these projects meet all the market's needs. Please look for information requests in the near future and send your comments back to me at:
